Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

- D1: WO 94/12193 A (DEBIOPHARM S.A; IBRAHIM, HOUSSAM; IRIE, TERUKO; MAUVERNAY, ROLLAND-YVE) 9 June 1994 (1994-06-09)

- D3: DE 103 14 377 A1 (STADA ARZNEIMITTEL AG) 7 October 2004 (2004-10-07)

Novelty:

The present application does meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-5 is new in the sense of Article 33(2) PCT.

None of the cited prior art documents discloses a composition comprising the specific weight ratio as claimed in claim 1.

Inventive step:

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-5 does not involve an inventive step in the sense of Article 33(3) PCT.

The present problem to be solved is the provision of an oxaliplatin lyophilizate which is stable and which has an alcoholic sugar of non-animal origin as a carrier.

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1 and 4, and discloses a composition of oxaliplatin lyophilizate in combination with an alcoholic sugar of non-animal origin such as a carrier (see in particular claim 7, examples and p. 4, 3rd § in D1).

The subject-matter of claim 1 therefore differs from this known oxaliplatin lyophilizate in that the weight ratio of oxaliplatin to the alcoholic sugar of non-animal origin is 1:3 to 1:7. However, the selected weight ratio does not seem to contribute to establish inventive step over D1, since no evidence over the importance of the selected weight

ratio for the stabilizing characteristics of the composition is derivable from the present application. Thus, the solution proposed in claim 1 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT).

The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claims 4, which therefore is also considered not inventive.
